PROFESSIONAL SUMMARY

Final year CS undergraduate at SASTRA, Has a Proven track record in building scalable data pipelines, cloud-native systems, and LLM/RAG applications using Python, SQL, NoSQL, Docker, and REST APIs. Selectively trained at Amazon ML Summer School 2025. Experienced with AWS, Azure, Git/GitHub Actions CI/CD, and DevOps tooling.

EDUCATION

- SASTRA Deemed to be University**
B.Tech in Computer Science and Engineering | CGPA: 7.9 / 10.00
- Aug 2023 — Expected May 2027
Thanjavur, India

EXPERIENCE

- Amazon Machine Learning Summer School 2025**
Trainee – AI/ML (Selective Program)
 - Trained in **supervised/unsupervised learning, Generative AI, and LLM-based system design** by Amazon Applied Scientists; directly applicable to enterprise data and cloud use cases.
 - Applied **Prompt Engineering and Retrieval-Augmented Generation (RAG)** techniques to build context-aware intelligent applications – skills transferable to Qualcomm’s AI/data initiatives.
- Aug 2025
Remote
- Robotics Club @ SASTRA**
Core Member – Software & Systems Integration
 - Built **gesture-controlled robotic systems** with real-time data processing and low-latency control loops, demonstrating end-to-end hardware-software integration ownership under strict constraints.
- Mar 2024 – Present
Thanjavur, India

PROJECTS

- LukMatch – AI Job Discovery Platform** | *Python, LLMs, PostgreSQL, Docker, REST APIs*
Mar 2026 – Present
 - Engineered **semantic candidate-job matching** using LLM embeddings, improving match accuracy over keyword filtering.
 - Built **scalable ingestion pipelines** aggregating multi-source job data into a normalized PostgreSQL store.
 - Deployed **approval-gated application pipeline** via containerized microservices with RESTful orchestration.
 - LukBill – AI-Powered Medical Billing Pipeline** | *Python, NLP, MongoDB, Express.js, React.js*
Aug 2025 – Dec 2025
 - Built an end-to-end **NLP pipeline** to ingest unstructured clinical records and auto-generate structured medical invoices, cutting manual data entry errors by **60%**.
 - Designed **MongoDB-backed document store** with Express.js REST APIs; frontend in React.js for real-time invoice review and audit.
 - LukWealth – Financial Data Management Platform** | *PostgreSQL, Node.js, React.js, Docker, CI/CD*
Jan 2026 – Present
 - Architected a **PostgreSQL relational schema** for financial analytics, optimizing query performance for high-volume transactional data with JWT and RBAC security.
 - Containerized the full stack with **Docker** and automated deployments via **GitHub Actions CI/CD** – directly mirroring Qualcomm OneIT’s DevOps practices.

TECHNICAL SKILLS

- AI & Data:** ML (scikit-learn, Pandas, NumPy), NLP, Generative AI, LLM/RAG Applications, Prompt Engineering, ETL pipelines, Tableau/Power BI (basic).
- Programming & Databases:** Python, JavaScript, Java, C++, SQL (PostgreSQL, MySQL), NoSQL (MongoDB), Redis, Elasticsearch.
- Cloud, Backend & DevOps:** REST APIs, Microservices, Node.js, Express.js, Docker, Kubernetes (basic), AWS, Azure, Jenkins (basic), GitHub Actions CI/CD.

ACHIEVEMENTS & ACTIVITIES

- Amazon ML Summer School 2025 (Selective):** Chosen nationally for advanced training in ML, GenAI, and LLMs.
- Goldman Sachs Operations Virtual Experience:** Completed Forage simulation; gained exposure to trade lifecycles, reconciliation, and operational data management.
- Algorithmic Problem Solving:** Solved **250+ problems** on [LeetCode](https://leetcode.com) across data structures and algorithms.
- Competitions:** Meta Hackathon 2026, GDG Solution Challenge India, Mimamsa Science Olympiad by IISER Pune.
- Languages:** Tamil (Native), English (Professional), German (Elementary).
